COMPRESSED AIR

CHALLENGE

An invitation-only training event that will help you take your facility's compressed air system to the **next level of energy savings.**

TRAINING DETAILS

Fundamentals of Compressed Air Systems

Wednesday, Sept. 12, 2018 | 8 AM – 4 PM

Lindenwood University
Collinsville Extension Center
1101 Eastport Plaza Drive,
Collinsville, IL 62234

Cost: FREE* (Normally \$475 per person)

** This offer can only be extended to a limited number of Ameren Illinois customers; limit two personnel per facility.*

Compressed air systems hold the key to greater productivity, efficiency and profitability in your facility. You just have to understand where to look and what to do. The Compressed Air Challenge will help you evaluate your own compressed air system and apply proven techniques to reduce operating costs and improve your productivity, product quality, system reliability and competitiveness.

WHAT THIS TRAINING OFFERS:

- » Development opportunities for your facility engineers, operators, and maintenance staff
- » Curriculum created by compressed air industry experts and taught by a certified trainer
- » Content that demonstrates how to achieve 15-25% cost savings through proper controls, maintenance, and operation
- » Lunch, textbooks and certification provided
